

October 15, 2024

To Whom it may concern:

I am writing this letter to express my full endorsement of Reuben Rosen for a research assistant position at North Carolina State University.

As the Director for Research and Development at Baxter Healthcare, I had the opportunity to work with Reuben from 2023-2024. Baxter sponsors graduate school research and projects in the Master of Engineering program at Cornell University. We worked with Reuben and his team on some neurological assessment tools to support post-surgical patient care.

In our project, Reuben displayed a high attention to detail, as well as very diverse skills to get the project done on time and to meet outlined goals. He displayed leadership as well as being a solid team player when decisions were made. With respect to his skillset he displayed detailed working knowledge of hardware and software to help create our assessment system. An example of this within our assessment system is utilization of computer vision as well as a patient user interface which Reuben created and tested.

In conclusion, I have no reservations recommending Reuben Rosen for a research assistant position at North Carolina State University. I am confident he will be successful and completely represent your university to the highest extent in the future. I am available any time if there are questions.

Thank You.

John A. Lane
